

Inner City Outings Online Fingerprint Screening Process

The National ICO has set up a corporate account with an online screening service, Excel Screening. The service will allow each ICO certification chairman to submit the candidate's information via the Internet and receive the results in a timely manner. It will no longer be necessary for each candidate to go to DVM for the driving record or the police station for fingerprints. It also means (hopefully) that it will not take many weeks to complete the screening process.

The screening service includes:

- instant nationwide criminal database search
- instant past address history search
- sex offender registry check
- driving history report

The screening package costs \$13.25 per person plus the state motor vehicle report fee (\$5 in California). It appears that the National ICO office will reimburse for the costs.
